

NEW!

One touch aerator tap

a unique solution to automatic water control

- one-touch-on to activate flow, and aerator tap will automatically shut off after short period (user adjustable 2-20 sec)
- alternative model - one-touch-on, one-touch-off
- water saving - can slash water consumption in public bathrooms by up to 90%
- highly cost-effective - costs a fraction of a sensor tap, yet performs the same function without the hassle
- easy installation - simply screw onto current spout
- almost zero maintenance - no electrical or complex mechanical parts
- theft proof installation - cannot be removed
- energy saving - uses no batteries or power supply
- hygienic - no need to touch a contaminated tap
- reliable - tested to 200 000 cycles
- adaptable - a variety of mounting options, including stylish, minimalist in-basin location
- a variety of attractive and complementary spouts and other hardware available - excellent value
- unique and innovative - winner of international awards

saving our water resources, every last drop
